I don't think they are confusing the issue. They said Prius and it is tough to confuse the two. The article did mention that it could have been a floor mat stuck in the peddle but it was Prius.

Its funny - I have never heard of it - I wondered if they were confusing the ES mat thing and this...But Morino's group would know if there are any real complaints...

Take care sir.

Best Regards,
Chris

I saw the article this morning and wondered why it was written. Is there any substantiation of this story?

Chris,

Autoblog picked up a clip from The Truth About Cars website reporting a story from Consumer Affairs regarding the Prius and sudden acceleration. Please take a look.
